AMMF Estimate Form

(V1.2)

Note:

- There are many variables in research and prototype machining which make estimating a job very difficult. The AMMF can only provide rough estimates.
- Changes to orders can have **significant** impacts to the time a job takes to complete.
- After the job is complete, a work order will be processed for the actual time, materials, and consumables used.
- Materials and specialty tooling are usually purchased directly by the customer, but please verify these choices with staff before ordering.

Date: ___/___/_____
